Summary of Skills

- Business Technical Lead on large scale system implementations and upgrades. Deeply involved with solution assessment, requirements management, operations process redesign and enhancement, user acceptance testing, and implementation planning and execution. A firm knowledge of the end to end project life cycle and methodologies.
- Routinely identified system efficiency gains through bespoke SQL and data analysis. Implemented configuration changes that resulted in a five percent increase in system straight through processing, moving tens of thousands of records away from manual intervention.
- Awarded Barclays Significant Technology Achievement Award in recognition of the outstanding contribution to the Kenya Replatforming Programme in the roles of Business Analyst and Implementation Manager. Awarded by CIO of Technology and COO of Barclays Africa.
- High risk awareness. Completed risk assessments, created control frameworks, owned and performed audits for new and updated operational processes and systems; both internally and in collaboration with third parties.
- Proficient in Ruby, Python, Javascript, SQL languages; with good understanding of common data structures and OOP / MVC principles.
- Solid communication skills. Experienced in facilitating requirements workshops, brainstorming sessions, training sessions, presentations, and meetings at all levels. Produced bespoke reports and MI for senior management.
